All referrals are active for 2 weeks, unless noted in the referral.

When a landowner has chosen a contractor to hire, the referral will be updated with the words:

“Decision has been made, and contractor has been hired”
The Forestry Assistance Program of the Alger & Marquette Conservation Districts provides the first professional contact with many landowners who are interested in forest management. Our role is to provide general guidance, basic management planning, and referrals to other public and private resource professionals.

When I encounter a landowner who has a project that could potentially use a consulting forester, I give them our list of consultants and, with their permission, I send a general description of the project to the consultants on the list via an email message, such as this one.

Consultants interested in pursuing the project described below should respond to me by email within two weeks. You may include additional relevant information in your responses or as attachments. Use good judgment in what you include so I don’t have to edit. I will forward your e-mail responses, and/or paper documents, to the landowner. I encourage landowners to contact all of the consultants who reply in a timely fashion, but they may delay or change their mind.

I follow-up with landowners to make sure they get the help they need. Give me a call if you want more information on any of the jobs - I usually have digital photographs and notes.

PROJECT MQT #2020-135

Location – Chocolay Township, Section 24, T47N R24W

Acres – 75 acres

Forest Type(s) – Upland northern hardwoods mixed with lowland hardwoods, ash, elm, and mixed conifer

Work Needed – EQIP Forest Management Plan development (Technical Service Provider certification required) for mixed use forestland. Goals are sustainable management and rehabilitation from harvest in the 1980s, firewood and livestock use, and a small sawmill operation.

Date Message Sent: August 20, 2020
Deadline for Responses: September 3, 2020
